Description

A steam boiler and engine possibly 1930s–1940s made from copper with a metal funnel and is driven by a gas burner . It has a brass pressure indicator with a white dial , also there is a glass tube to indicate water level. Connected to the side of the boiler is a lovely little Stuart engine . Attached to the boiler are various taps and copper pipes, also two small taps attached to the engine . It has an original bar that would of connected to mains gas which would flame the boiler . Standing on a wooden base . A very interesting little model . 43cm height 38cm width 18cm depth £1200 Contact 07970119030
