Description

A rare eight day 10 inch dial fusee bracket clock. Dating from the mid 19th Century this eight day English fusee wall clock comes with its own bracket and has a 10 inch dial. The flame mahogany case and bracket (attached) are both in excellent condition as is the unrestored dial which is complimented by original spade hands. Measuring 19 inches high and 12 inches wide this is a stunning example of a rare clock and having just been serviced by myself it comes with my two year guarantee as standard. Rather than trusting a courier of any sort I unreservedly recommend collection or I can deliver regionally/nationally. All antique clocks require delicate handling and specific setting up so it is far better for a dealer to meet a client and talk them through the process, or set the clock up for them, rather than leave the client struggling at the other end on their own. Clockwise specialises in longcase and bracket clocks and with clients from the world of business, film, sport, royalty and aristocracy - yet more than happy with traditional clients - Clockwise has an unrivalled reputation for excellence and superb service.
