Depth = 57 cm (22.4")

Description

This is a great large scale 19th century pine cupboard. It is in very good condition with thick deep shelves and 4 good sized smooth running drawers. It is an ideal piece for use in a kitchen as the shelves are so deep they can store anything you need. This piece started life in a Scottish chemist and has taken on a lovely worn appearance that only improves its decorative appeal. The brass handles all look to be original, the only thing that isn't is the two top drawer fronts which have been added at some point in its life. But still made from solid pine and although not quite as old they still have age and show attractive signs of wear. Its great to see a characterful piece of antique furniture that serves so many practical purposes. Height 232cm Width 131cm Depth 57cm Price includes UK mainland delivery
