

SA830482

19th Century continental ember lighter

Price

Sold**Item Reference: SA830482****Date of manufacture: 19th Century**

Description

A very fine example of a silver ember lighter. The lighter sits on 4 ball and claw feet. The underneath of the feet being wooden just like the two handles. The base is marked and very faintly around the rim near one of the handles are some worn zigzag marks. Based on the zigzag marks it is most likely that this is German in origin and the N might well stand for Nurnberg. It is in lovely condition, the silver is a super colour. Diameter of bowl 10 cm Length including handles 29.5 cm Height 5 cm
