Description

A beautiful antique gas heater made from intricate cast Iron. This was made in England, it dates from around the 1890-1910 period. The quality is amazing, this is beautifully designed and looks great from all angles. The condition seems to be excellent for its age, there is one very small area of damage to be seen on the lower section of one of the doors, seen in the images. There is an original brass gas burner inside, we haven't tested to see if it is working. Width - 17 inches , 43 cm Depth - 17 inches , 43 cm Height - 34 inches , 86 cm
