Description

Antique Omega pocket watch, c1910s. The watch has a stem-winding movement, signed Omega, which is working nicely. The movement is protected by an inner hinged cover which has details of exhibition medals won by Omega. There is some scratching to this inner cover. The watch measures 50mm diameter excluding the winding stem and the loop. The case is white metal, possibly a low purity silver. The inside of the case back has the Omega logo. The front of the case is in good condition, just very small marks where the case meets the lens. The back of the watch has unevenness. The acrylic lens is in good condition. The dial is in lovely condition. The watch comes in a new presentation box.
