## Wonderful Antique English Three Drawer Brass Telescope - Dated 1893

Price

**Sold****Item Reference: SA85772****Date of manufacture: 1890**

## Description

An unusual Victorian telescope made from wonderful polished solid English brass, which has just been professionally re-polished to gleam. It's unusual due to the covering of the barrel with a black woven fibre and a string natural woven cord top and bottom with a tab integrated into each. The lens has a brass cover and the eye piece has a little integrated shutter to protect the eye hole. This example is lucky enough to have a wonderful engraving, having been presented to George D. Pelly and dated 1893 (this was purchased with another engraved George Petty, clearly the same person but with one engraving misspelled). Excellent condition, measuring 6" in length extending to 16 1/2" in length. Item ID: 32465 ----- FREE Worldwide Registered Airmail Directly From London, England

Internal Ref: 32465
