Depth = 8 cm (3.1")

Description

For sale, an Eighteenth Century mahogany stick barometer by Charles Lincoln of London. A very interesting barometer with broken arch classical pediment and brass urn finial over a large silvered scale plate measuring 28 to 31 inches of barometric pressure to the right hand side of the barometer tube with hand operated Vernier for precise measurement and the left hand side bearing standard weather indications. The head of the scale plate has a brass dome to retain the top of the barometer tube and below is engraved with the maker's name, Charles Lincoln, London. The trunk of the barometer is dominated by a thirteen inch, dome topped and silvered thermometer scale measuring -10 to 120 degrees of Fahrenheit with temperature indications such as, Freezing, Temperate, Summer Heat and Blood Heat and similar to the barometer scale, a protective brass dome is incorporated over the thermometer bulb with a hole cut to the front to account for air circulation. The flame mahogany trunk terminates into a graduated, circular cistern cover which complements the reeded edge that runs around the edge of the body and a brass travel adjustment screw. Perhaps the most technically interesti...
