Depth = 22.5 cm (8.9")

## Description

For sale, a pair of mid Twentieth Century tripod mounted Fuji Meibo 15 x 80 Marine Binoculars. Considered the Rolls Royce example of marine binoculars, this fine example is completed with two large, three inch (80mm) objective lenses with screw mounted sun shades making a full barrel length of 33cms. The barrels are fitted with hand adjustable eyepieces to provide a comfortable fit for the observer's eyes and focus is achieved by a focus ring which surrounds the lens. The original rubber eye cups also remain with this example allowing additional comfort for the observer. The full length of the binoculars are 48cms with a barrel width of 22.5cms and the top of the barrel retains its original maker's plate stating, "Fuji Meibo 15 x 80 with serial number 5236 and Fuji Photo Optical Co Ltd - Made in Japan" below. The binoculars are mounted on their original stand capable of a 360 degrees range and vertical adjustment with locking arm to maintain position for observation. Whilst aboard ship, these binoculars would have been mounted on large aluminium posts which would be bolted to a ships deck so the stand has been provided to allow for more comfortable and portable use ...
