Depth = 5 cm (2.0")

Description

For sale an early Victorian Met Office registered aneroid precision barometer by Patrick Adie, London. One of the best aneroid barometers I have had the pleasure of presenting recently, it is comprised of four and half inch split level silvered dial with long pressure scale around the outer ring measuring 24 to 31 inches of barometric pressure. The lower dial is provided with simple weather indications stating rain, change & fair and the word compensated to denote it compensation for temperature. The upper section is also provided with the Governmental broad arrow sign and the early Met Office serial number of M31. The lower half has a delicately curved Fahrenheit thermometer with beautifully engraved scale reading for 10 to 120 degrees and above is the maker's name, Adie, 395 Strand, London. The barometer is also fitted with an extraordinarily thin, blue steel pointer with Breguet style crescent moon design at the back end and culminating to an extremely fine point to allow for precision reading. The drum type brass case has a hanging loop to the top and the reverse is stamped with the same broad arrow and serial number as is engraved on the dial (M31) and adjustment sc...
