Width = 6.5 cm (2.6")

Depth = 6.5 cm (2.6")

Description

For sale, a late Victorian Harding's Patent Revolution Counter marked to AH Bateman & Co of East Greenwich, London. Enclosed in a pocket sized, leather covered case with red silk and velvet interior, this 1 ¾" diameter revolution counter is comprised of a nickel plated case with glazed front protecting a brass, japanned plate with apertures revealing four number dials. This fascinating mechanism is explained in more detail below by virtue of its appearance in the 1878 release of the voluminous catalogues of Negretti & Zambra. "Hardings Patent Circular Dial Engine Counter The case with which the record of these counters can at any time be read off is a great advantage which they possess over all dial counters (such as those on water and gas meters), in the difficult reading of which important errors are often made. Other advantages of these counters are, great simplicity of parts and solidity of construction, in consequence of which it is almost impossible for the apparatus to get out of order. It consists in an ingenious combination of wheel and pinions. Each number wheel carries on the right edge of its rim twenty teeth, and on the left edge only two. The pinions a...
