Description

For sale, a Mid Twentieth Century Anatomical Elbow Joint by Educational & Scientific Plastics Limited. Manufactured entirely from plastic, this model presents an anatomically correct human elbow joint which would have been used by schools or medical schools during the middle part of the century. The model, measures twenty centimetres in height and width and retains its original plastic folder with explanatory card. It reads: Elbow Joint (Right) – SAM 115 Annular ligament of the radius Radial collateral lig. Middle part of ulnar collateral lig. Transverse band “ “ “ Anterior “ “ “ Tendon of Biceps Chorda obliqua Capsular lig. Post “ “ Interosseous membrane All of the associated numbers are painted onto the model to align with the attached card key and is further reflected in the company’s catalogue of the period. Evidently from their catalogues, all their models were given a serial code beginning with “Sam”, the name affectionately given to their full, and small scale skeleton models. It further states: “The company was founded in 1949, at the end of which year it produced the world’s first synthetic skeleton, entire...”
