Description

A rare Edwardian mantel clock timepiece with a barometer and thermometer in a mahogany case, the top with gilt brass handle over a case with sloping shoulders to circular brass bezels with to the left a timepiece with a 2 1/2" off white dial with Roman numerals and outer minute track in black and quarter minutes in red and with blued steel hands and with a French eight day movement with English lever escapement, and to the right an aneroid barometer with a similar dial with pressure gauge in red numbers, black and gold hands, with a mercury thermometer to the centre with an ivory plate in Fahrenheit, with turned gilt brass finials to the corners, boxwood and ivory inlay and on gilt brass bracket feet. English, with a French movement, circa 1900. Condition: Excellent, the case is in extremely good condition, the clock has been overhauled and is in very good working order, the barometer also works. The whole has a pleasing appearance and the case has good colour and lovely inlay.
