Dimensions

Height = 186 cm (73.2")

Description

The wonderful weight driven movement boasts substantial plates, six spoke wheels with high pinion counts, Harrisons maintaining power, dead beat escapement, temperature compensated mercurial pendulum with a beautifully engraved surround to the mercury jar. The silvered engraved dial measuring 12" is of standard regulator style featuring the minutes around the outer edge and subsidiary seconds dial above the subsidiary hour dial in the centre. The dial is also engraved "Fk Rowe - Gt Marlow." to the centre with original finely cut blued steel hands. The beautiful heavy mahogany case with a long glazed trunk door and mahogany base. Altogether a beautiful small longcase clock made to impeccable standards. Serviced and guaranteed for 3 years. Height: 73 1/4? (6ft 1?) or 186cm CIRCA. 1870 Provenance: Private collection U.K. *Pictures taken prior to restoration* Would you like to view this clock in your own home?
