Description

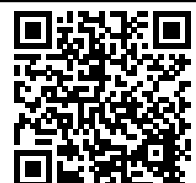

Circa 1900 a heavy brass lion's foot doorstop, with the original lead weight. It measures 36cm in height, it is 10cm at the widest part and approximately 9.5cm deep. The quality of the casting shows in the details on the handle and the claws on the foot. The doorstop weighs 2.2kgs, and it has been professionally polished but not lacquered. The slight lean backwards is not as obvious as may appear in the images and the handle is solid and secure. Postage and packing for the UK mainland only is included in the price and for outside areas or abroad please contact us for a delivery quote.
