### Dimensions

Height = 200 cm (78.7")

Width = 200 cm (78.7")

Depth = 125 cm (49.2")

## Description

Hi I have for sale a very heavy English fusee ships clock sold with a fully restored chain driven fusee movement and a new spring made by Kelvin & James White LTD of Glasgow. The Case The case is in solid brass which has been cleaned but left as a matt finish can be polished by the new owner if desired but I like the old original look to the clock; she is 8" across x depth of 5" and in good original condition with a cast hinged thick beveled glass front door released via the original push side button. The Dial The dial is in good original condition in white enamel at 140cm across, the clock also retains its original black/blue spade hands and is signed by the maker's Kelvin & James White LTD of Glasgow but as seen only Kelvin & J is still visible. The Movement The movement is an eight-day time only; she has been fully restored by myself with a new spring added and runs faultlessly over eight days a really heavy movement signed inside the fusee cone top on the original chain. Overall a very original clock which contains all of its original features this is quite a rare find these days. If you require any further information, please ask. I am happy to send more photographs...

Internal Ref: ships fusee
