Depth = 9 cm (3.5")

Description

Here we have an antique carriage timepiece by the famous Henri Jacot with an alarm. Clocks as original as this very rarely pop up. This example is in a fine polished 'corniche' case. The case is solid brass and has been polished and professionally lacquered. The clock has remarkably avoided any damage to the dial, no corner chips, no hairlines, just an extremely clean white vitreous enamel dial typical of Jacot. The glasses are all in remarkable condition too. Thick bevelled glass with no cracks (just an extremely tiny corner chip to the top left corner of the rear door). The escapement is the original silvered Henri Jacot high quality jeweled lever. This has been fully cleaned and serviced which involved removing all end stones, balance clock, and bridge. cleaning jewel holes, ultrasonic clean and rinse. The alarm is set by twisting the alarm hand to the desired hour then wind the Alarm barrel from the rear top left corner and your set. You are also welcome to come and view the clock in our shop. We are in Westcliff on sea. The clock stands 17cms tall, 10cms wide and 8cms deep. We can ship the clock internationally but please ask for a quotation as international...

Internal Ref: Jacot time Alarm
