Width = 30 cm (11.8")

Depth = 17 cm (6.7")

Description

Hi I have for sale an 1892 double fusee bracket clock in stunning condition for the age and striking the hours on a bell with a nice early movement fully serviced in perfect working order made by Osborn of Bognor, listed as a postmaster in Bognor Regis a very rare maker listed as working 1 year. The Case The case is in beautiful mahogany and stands 18" high x 12" wide with a depth of 7" it is in very good original condition very shiny has had a lot of wax over the years very well looked after, with a thick convex glass front door and glass side panels. The clock stands on brass ball feet. The lock from the rear door is missing put shuts ok and the original shelf is still with the clock. The Dial The dial is in good original condition painted white steel with Roman numerals which is 8" wide and still retains the fine spade hands signed by the maker Osborn of Bognor. The Movement The movement is an eight-day double fusee time and strike which strikes the hours on a large tuned bell to the rear, the movement has been serviced two months ago so keeping good time over eight days via the original London-style pendulum.

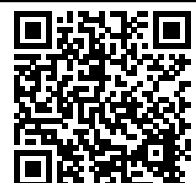

Overall a very nice clock quite rare in this original con...
