Width = 21 cm (8.3")

Depth = 10 cm (3.9")

Description

Hi I have for sale a 1940s ship's clock a very heavy clock of some quality, it is in really good original condition fully cleaned and serviced so keeping good time. The clock must have been made around the second world war as to save on brass they used an outer steel band and on the rear, it is stamped A.M ? so might have had forces use in the past. The movement and platform have been fully restored as has the casework. The Case The case is solid brass and steel and is 9"(The widest back plate part) across x depth of 4" and is in really nice condition. The Dial The dial is in original condition 7" wide in painted white steel; the clock also retains its original black ornate hands and red seconds hand and is signed Smiths 8 day and made in England. The Movement The movement is a Time only; the movement is in good working condition and going eight days just been fully ultrasonic cleaned and restored as has the platform escapement but timekeeping is within 2 -5 minutes a week this is an old clock, not a quartz clock. A winding key is included. Overall a very original heavy clock that contains all of its original features is quite a rare find these days. I have had many of...
