Description

This is a true English Regulator with all of the main features. The extremely substantial, 8 day duration, 5 pillar, weight driven, timepiece movement with jewelled pallets Dead-beat escapement, Harrison's maintaining power, shaped plates, top-mounted crutch beat setting adjuster, 6 spoked wheels throughout, end stops to the escape wheel and a mercurial, faceted glass jar, temperature-compensated pendulum with a graduated regulation nut, small weight tray and free-standing and silvered graduated beat plaque. The brass-cased weight is hung from a 5 spoked pulley wheel which passes through a hole in the base top board. Also having a substantial cast iron 'A' frame pendulum suspension bracket and the movement is fixed to the seatboard with two substantial fixing knobs. Behind an 11 1/2" visible, flat, circular, silvered and engraved regulator dial with outer, Arabic 5 minute numerals, a divided minute track with bold 5 minute markings and the centre having a conforming upper subsidiary seconds dial with outer divided track and inner Arabic 10 second markings. The lower portion has an hour dial with outer ring and inner Roman numerals. The 3 blued steel hands are precisely c...
