Height = 259 cm (102.0")

Description

This stunning quarter chiming longcase clock boasts the high quality workmanship associated with this fine period of clockmaking excellence. A truly stunning case would not look out of place amongst royalty, with the beautiful mahogany case, attractive dial and comprehensive movement to match. This is a wonderful clock that would complement any collection. Movement: The substantial movement held by six knopped and finned pillars is of 8-day duration, with three brass bound weights driving the clock. The movement runs three trains for the going train; to tell the time and date, the hourly strike train; striking a single bell upon the hour, and the quarter chiming train; striking two smaller bells, where each strike represents each quarter hour passed. Using Graham's dead-beat escapement, with a considerable iron and wood rod pendulum, with a very heavy lenticular brass bob and silvered engraved rating nut. Case: A wonderfully grand mahogany veneered case. The elegant deep flamed Mahogany case with pagoda top and blind fret above a long shaped moulded door with canted corners and typical London applied panel base upon a double plinth. The clock is complete with all three ...
