Antique Electa pocket watch and chain

Price

Sold**Item Reference: SA938687****Date of manufacture: 1900**

Description

Antique Electa pocket watch and chain. The watch has a Swiss high grade 17-jewel stem-winding movement with Breguet hairspring for enhanced precision, screw-set jewels in gold settings and micro regulator, which is working nicely. The movement is protected by an inner hinged cover which has a couple of small indentations and general light surface marking. The watch measures 50mm diameter excluding the winding stem and the loop. The case is the gold filled Moon model from the Dennison Watch Company. Dennisons was an English case maker and supplier to various watch makers. The case has a little unevenness to the back and general light surface marks. The glass lens has a couple of short scratches over number 8 but otherwise is in good condition. The dial has been left blank for the original retailer to add their details if required. It is in lovely condition with blued steel hands, a subsidiary seconds dial and an outer minute track. The watch comes with a double albert with each chain measuring 24cm long including the T-bar and the clasp. The watch and chain come in a new presentation box.
