Dimensions

Height = 6.4 cm (2.5")

Width = 11.8 cm (4.6")

Depth = 11.8 cm (4.6")

Description

Always very popular and a very useful desk-top accessory. These large circular magnifiers actually are the condenser or magnifier from a Magic Lantern dating to around 1910; they are rescued, polished up and put back to use in the modern day. This one is made from polished brass and is excellent quality having a lovely domed lens rather than flat on top, un-marked but probably by Optimus. Wonderful condition, with a good magnification and a hefty piece to keep those papers in place. 5" in diameter x 2 1/2" high to top of dome. Item: 44078 FREE Worldwide Registered Airmail Directly From the UK
