Depth = 2 cm (0.8")

Description

An anotomical chart of the respiratory system and one of the Heart by Adam Rouilly and co. They are good sized early charts pre war we believe from the Fitzroy London address. The company started in the very early 1900s and moved in the mid 60s. These charts have good colour and good detail as can be seen in the pictures, One has had some support to the fabric at the rear but does not effect the look. It has been in our store for years and as coming up to retirement we are having a sort out. The second one has some usage marking but is quite clear. There are one or two more that will be available in the near future. give us a call if you would like more information. There is a full body one listed already. Please see separate listing. 01565 874075. Please note price is for two charts so really keenly priced at only £110 for both.
