Description

Longines Silver 0.800 Open Faced Pocket Watch 1906 A Longines Silver 0.800 open face keyless wind pocket watch, made in Switzerland in 1906. The all-original pocket watch is signed Longines three times: on the dial, on the inside case and on the movement. This pocket watch has just been serviced by my watchmaker and therefore is great working and very clean condition. Dial: The white enamel dial has black Arabic nice numerals and outer minute divisions. The dial has nice golden antique style hands and a subsidiary sunken second's dial at the six. The dial is signed: "Longines" in the upper centre. Movement: The high-grade Swiss made lever escapement movement is clean and in fine working order. The movement is signed: "Longines, GF" and numbered: 1930051. The watch is in great working condition; however, we cannot guarantee accuracy for an antique pocket watch. Case: The watch lies in a silver open face case with a monogram free cartouche. The inner side of the case is stamped 0.800 for silver on the cover and the cuvette. The inner side of the case is signed: "Longines EFCO" with the logo and numbered: 1930051. The cuvette shows different medals and is decoratively sig...

Internal Ref: longines silver case 1930051
