Description

Antique Walnut German Ting Tang Mantel Clock With Ormolu Mounts By Lenzkirch. This lovely antique mantel clock has a beautiful walnut case with a fantastic rich colour and grain. The top of the case is then shaped with a floral style front and four flame style finials to each corner. There are then a selection of mouldings as well as an array of detailed gilt mounts which contract the walnut perfectly. There are then two fretwork panels in each side backed with lovely light blue silk. There are then further shaped mouldings to the bottom as well as two shaped feet to the front and two round feet to the back. The dial is then arched with a silvered chapter ring set out in black Roman numerals with a thin ring setting out the minutes and every five minutes marked in Arabic numerals. There is then a further "SLOW FAST" chapter ring to the arch. The dial then has fantastically intricate fretworks to both the arch and the bottom corners. Finally the dial has a silvered frame, two shaped fingers and a bevelled protective glass set into the door. The movement is then wound from the front and accessed from the back. It is ticking away and chiming as it should and chimes on...
