Depth = 12.7 cm (5.0")

Description

A small and superior example of this iconic, mid 19th century style of table timepiece. The 8 day duration, chain fusee movement Anchor Recoil escapement having unusual pallets. Also having Harrison's maintaining power, transit pendulum lock and micrometer, top-mounted pendulum bob regulation. Behind a well-executed, 3 1/2" square, engine turned and gilded brass dial with written Roman hour numerals and cut steel hands the hour of which being trefoil style. This is behind a cast brass, chamfered sight frame set within the locking front glazed door. In a satinwood 5-glass case of good colour. The flat top having a thick and bevelled glass panel which is repeated to both sides. Both doors are locking and glazed. below the top is a small Cavetto moulding above a rippled moulding and below the front door is a large ogee moulding above a short plinth with a simply moulded top. This sits upon 4 squashed bun feet. * There is an old trade paper stuck to the inside of the case that states the movement was cleaned in July, 1858 - probably its first maintenance. Dimensions: 9" high x 6 3/8" wide x 4 7/8" deep. Condition: The movement is working very well and keeping accurate t...
