Depth = 84 cm (33.1")

Description

Edwardian Octagonal Centre Table. A stunning centre piece table. This is a marvellous Edwardian centre table believed to be made around C1890 from solid Walnut. This unusual octagonal centre table features a solid Walnut moulded top and lower edge which goes to its framed fully carved frieze, with alternating floral carvings to all sides. Below the carvings the table has inverse pie crust aprons which falls to its 8 finely turned legs. The lower shelf is also made from solid Walnut with a moulded edge finishing to shaped aprons between the legs. This centre table is ideal for placement in a grand entrance hallway accompanied with a focal arrangement such as a large bouquet of flowers, plants, statues, figurines or even taxidermy. We have just cleaned and waxed to give a natural shine and enhance the surface. The table is strong and there is no joint movement, play or wobbles in any of the joints and the tops are flat without twisting. Please note; This item is in an outstanding condition for its age as shown by the photographs below. Being an antique item of this age there are obviously marks, scratches, dents and the odd repair here and there. Dimensions Height:...
