Gents Bulova Accutron tuning fork watch, 1964

Price

Sold**Item Reference: SA962453****Date of manufacture: 1960**

Description

Gents Bulova Accutron tuning fork watch, 1964. The watch has a calibre 214 tuning fork movement which is working nicely... a new battery has been fitted and it has the distinctive Accutron hum. The name Accutron comes from ACCURacy through ELECTRONic, and it was the world's first electronic watch functioning with a tuning fork. This revolutionary design and new found accuracy brought fame and success to Bulova, especially when American astronauts started to wear them on their missions. The watch measures 35mm diameter excluding the lugs. The case is stainless steel and it is in good condition, as is the lens. The signed dial is in its original finish with a subtle linen style pattern. Original hands, initially set by way of the mechanism on the back of the watch, centre seconds hand and the tuning fork logo at number 12. A new leather strap has been fitted. The watch comes in a new presentation box.
