### Dimensions

Height = 40 cm (15.7")

Width = 40 cm (15.7")

Depth = 18 cm (7.1")

## Description

WE have a fusee wall clock which is in tidy condition except it needs a feather. My colleague at country clocks has unfortunately retired so there is no one to fit one here any more. We have disassembled the clock to check it out and everything seems ok except for the feather. Dial is a 12 inch and it has the brass bezel, If you are very fussy the movement might benefit with a clean but its still working fine and tripping with vigour, personally I would leave as it is as there are no issues currently other than the broken feather. We have a short video of the tripping which I thought I could upload but cant see how to. All working, this clock is £500 plus in reality, so at £250 its got plenty in it to be able to fit a feather and put on test. The movement plates are a nice shape too. give us a call to discuss 01565 874075. Can be collected from Knutsford or we could post but would rather not send a clock movement in the post if possible.
