Antique gun metal Omega pocket watch

Price

Sold**Item Reference: SA967277****Date of manufacture: 1910**

Description

Antique gun metal Omega pocket watch. The watch has a good quality stem-winding movement which is working nicely. As with early Omega pocket watches, the serial number will be underneath the dial. The movement has been identified as being by Omega. The movement is protected by an inner hinged cover. The watch measures 47mm diameter excluding the winding stem and the loop. The gun metal case is in good condition and has gold coloured embellishments. The case has general surface marking but overall it is in nice condition for an early 1900s piece. The inside of the case back is signed with the Omega logo. The glass lens is in nice condition with only the odd minor mark from use. The white enamel dial has a very faint hairline crack between 12 & 1 and a small nibble to the centre of the sub seconds hole although it looks good to the naked eye. The watch has rose gold steel hands which have aged over the years. The watch will be sent in a new presentation box.
