Width = 12 cm (4.7")

Depth = 12 cm (4.7")

Description

Hi I have for sale a very heavy English fusee ship's clock sold with a fully serviced chain-driven fusee movement by Prescott & Co of Prescott. The Case The case is in solid brass which has been cleaned and polished; she is 24cm across x depth of 12cm and in good original condition with a cast-hinged thick beveled glass front door released via the original key and lock. The Dial The dial is in good original condition in white enamel at 175cm across, also the clock also retains its original black/blue spade hands. The Movement The movement is an eight-day time only; she has been fully serviced by myself with a new spring added and runs faultlessly over eight days a really heavy movement and running via the original chain. Overall a very original clock that contains all of its original features is quite a rare find these days. If you require any further information, please ask. I am happy to send more photographs or can video of the clock running if desired. You are also very welcome to come and view the clock in person, which I would be happy to recommend as the photographs really can't do it justice. As with all my clocks, this one is sold with a 'back-to-base' 3-month g...
