Antique silver perpetual calendar pocket watch

Price

Sold**Item Reference: SA971007****Date of manufacture: 1900**

Description

Antique silver perpetual calendar / moonphase pocket watch. UK POSTAGE ONLY FOR THIS ITEM The watch has a good quality stem-winding movement which is working nicely. The movement is protected by an inner hinged cover which has a little unevenness. The watch measures 48mm diameter excluding the winding stem and the loop. The case is 935, so slightly purer than sterling silver, and there are Continental hallmarks inside both of the case backs. The case is in good condition, just the odd minor mark. The engine turned detail to the back of the watch is still nice and crisp and there is a small central vacant cartouche. The acrylic lens is in good condition. The dial has four subsidiary dials, for day, date, month and moon phase, all set by way of the small push buttons to the side of the case. The dial is beautifully detailed including the beautiful blue highlights. There are some faint hairlines radiating from the centre of the top sub dial, and a couple from the moon phase dial. Pin-set hands. The watch comes in a vintage presentation box from a Bedford jeweller.
