Width = 23 cm (9.1")

Depth = 8 cm (3.1")

Description

Hi I have for sale a large English double fusee skeleton clock made around the 1930s with the original wood base and dome. The Case The case/frame is in solid brass and stands 38cm high and 23cm with the e with a depth of 8cm it is in perfect condition standing on a solid wooden base, it is very heavy with thick heavy plates, a top quality old clock. The Dial The dial is in good original condition silvered with black Roman numerals and its original blued steel hands. The Movement The movement is an eight-day time and strike, the movement has been fully serviced so keeps a great time over the eight days via the original pendulum to the rear and runs via the original twin fusee barrels. Overall a beautiful English skeleton clock by a quality maker that looks stunning on display and contains all of its original features this is quite a rare find these days. I will not post collection is best or I can arrange hand-to-hand delivery.

Internal Ref: Clive Double Fusee Skeleton
