Description

Professionally serviced with a 12 month warranty. Solid 9ct Rose gold gents pocket watch by the premier Swiss maker Omega. It has a high grade fully jewelled gilt movement. This is an Omega grade DD movement one of the highest grades manufactured and running to chronometer precision with the highest standard of finishing. Omega movements of this standard rarely come onto the market. Its 49mm in diameter full size gents, heavy 9ct rose gold case by Dennisons with Birmingham 1925 hallmarks to inner covers, bow and stem tube. The movement is a 16 jewel fully gilt Omega calibre 20''' NN-L 7-16P running within 4 seconds per day. The case is in superb condition all of the covers snap into place crisply and squarely. The hands are blued steel. The enamel dial is near mint with only the faintest of small hair lines between the sub dial and dial centre, even on high magnification its hard to see but it is there. The glass is original and perfect. It comes with an Omega felt pouch, I don't think this is original but my guess is that it was probably added when it went back to Omega for a service in the 1950s before Omega changed all of their boxes and packaging to their...

Internal Ref: Omega rose pocket watch
