Description

A beautiful Indian solid silver caddy or offering spoon. It is unmarked but tests as high grade silver. I would date it to c1900. It has been superbly designed with the handle being cast in the form of a lizard and the bowl being engraved with a figure. It is in superb condition being free from dings splits and repairs. It measures approx. 4 inches (10cm) long by 1 inch (2.6cm) across the bowl and it weighs 30 grams. A well made very nice quality piece.
