Depth = 18 cm (7.1")

Description

Hi I have for sale an 1860s fusee convex dial clock with a 14" dial in a solid flame mahogany dovetailed case with a very thin wooden rim and convex glass and cast brass bezel. The Case The case is in solid flame mahogany and stands 43cm round x 18cm in depth. It is in beautiful original condition well waxed and polished over the years a really nice colour and an inlaid ivory escutcheon plate around the bottom door keyhole but no key. The clock has an opening side and bottom door., and on the top of the clock is the steel hanging bracket. The Dial The dial is in original condition convex 14" across painted white with Roman numerals and covered by large convex glass in a heavy cast brass bezel. The dial says Walford & Sons Banbury. The Movement The movement is an eight-day time-only fusee it is a thick plated heavy built movement with thick pillars very fine crutch a sign of a top-quality old movement. The movement has just been fully ultra-sonic cleaned and restored with a new spring and gut added by myself and is running strong keeping good time over the eight days. The fusee is run via gut; she still retains the original pendulum/key. Overall a very nice original cloc...

Internal Ref: convex 14
