Description

Hi I have for sale an electromagnetic clock made by Eureka for just 1 year using the three instead of two ball bearings to pivot the main spinning wheel and the second's hand on the dial, this is a mega rare clock and comes with the book with a chapter to explain this in great detail. The Case The case is in solid mahogany in the London style with the brass inlaid columns full glass front door in the broken arch design, She stands 40cm high x 29cm wide with a depth of 15cm it is in very good original condition and looked after over the years. . The Dial The dial is in mint original condition marked with Arabic numerals sweep seconds hand and signed Eureka Clock Company LTD, London. The Movement The movement is in perfect running order keeping good time as I restored the clock about two years ago and runs via a dry cell in the base. Please study the pictures for model number year ect and ask any questions as this is a rare clock to the market. I will post but the collection is preferred if possible.
