Description

A good example of a small antique copper bucket. It is the perfect size for a coal or kindling bin. It is very good quality with riveted details and a brass swing handle. It is in good original condition and displays beautifully. There are no major damages but it has of course picked up some dinks and dents and signs of age and use. There have been some old soldered repairs to the underneath, presumably repairing small holes or splits. It has been lightly cleaned and polished and is ready for use. Approximate Measurements : Diameter : 12 1/2" (32cm) Height : 11" (28cm) The best description comes from the photographs so please look at them all carefully and if you have any questions just ask.
